

Temperature Datalogger

Environmental Datalogger & Greenhouse Controller

A compact, wireless monitoring solution featuring:

Built-in Sensors – Temperature, humidity, and ambient light measurement

Wireless Connectivity – WiFi and Bluetooth enabled for remote access

Expandable Storage – Removable microSD card for long-term data logging

Configurable I/O – GPIO breakouts for additional sensors and control of lights, pumps, drip lines, and more

Versatile Applications – Ideal for greenhouses, labs, and environmental monitoring
